INTRODUCTION

Launched in December 2021, CryptoWallCity is one of the fastest-growing communities in the cryptocurrency market. We have websites and social networks that keep up to date with news, project reviews, and trends in the cryptocurrency market. CryptoWallCity with the mission of connecting the community, as well as a bridge between potential projects to users. CryptoWallCity is built on Binance Smart Chain with extremely fast 5 second block times and cheaper gas fees than Ethereum. We provide a platform with CryptoWallCity Protocol, CWC Fund (CryptoWallCity).

ROADMAP

TARGET

TRANSPARENCY

CryptoWallCity is decentralized and supported by the community. We encourage communication, trust, and transparency with the community as the long-term development direction of the project.

TRUST

In the Cryptocurrency market, trust is paramount. That means complete transparency not only in the community and development but also in crypto organizations. CryptoWallCity will be audited by a third-party financial institution. In addition, we will burn and lock the majority of LP tokens. There is no pull rug here.

COMMUNITY

CryptoWallCity is one of the growing and most loved projects of the crypto community, we believe that only together can we be strong. CryptoWallCity strives to bring information about the crypto market to people from all over the world. We have many channels to send telegrams to the international community. Let CryptoWallCity be a part of you.

LONGEVITY

CryptoWallCity is the project of the future. We focus on the decentralized community to promote and adopt the long-term development of the ecosystem and the platform.

CRYPTOWALLCITY

CryptoWallCity (CWC) was created on the BSC network.

Contract Address: <https://bscscan.com/token/0x2292Ff9C69a79B55B20C432076Fd8C0a9E2a9940>

Add LP: <https://bscscan.com/address/0x4c46b300f3a20bf21848d5ae85adb63a78ec4a9b>

LP Burned: <https://bscscan.com/token/0x0c3fD9396Bac9f9e3c47a78f5d3BEb4Cf98024e9#balances>

Why CryptoWallCity choose the Binance Smart Chain network?

Binance Smart Chain (BSC) was developed as a means of utilizing solidity-based smart contracts with much greater speed and efficiency than other, competing chains.

With decentralized exchanges on BSC offering lightning-fast swaps and extremely low fees, BSC has started to become one of the most widely used blockchains for Decentralized Finance (Defi).

The advantages of the Binance Smart Chain are: It is a proprietary blockchain, which will provide security and safety to all users and developers.

Its native dual-chain interoperability will allow cross-chain to communicate and scale high-performance dApps that require a fast and smooth user experience.

It is EVM compatible and will support all existing Ethereum engines along with faster and cheaper transactions. Its on-chain governance with Proof of Staked Authority consensus, built on 21 validators validating transactions, will provide decentralization and allow for substantial community participation.

TOKENOMICS

CWC PROTOCOL

CWC Fund

01

We will deduct part of profits from CryptoWallCity community activities and affiliate marketing profits to create CWC Fund.

- 70% we will use to buy back CWC tokens for perpetual burning.
- 20% we will invest in potential platform projects.
- 10% we will invest in Pre-Sale projects and Low Capitalization projects.

02

Buy Back & Burn

30% of the CWC fund's profit when investing in platform projects, pre-sale projects, and low capitalization, we will use it to buy back CWC tokens and burn them forever.

03

Burn

70% of the total supply has been burned.
3% will be burned forever with each transaction.

ROADMAP

- ❖ Website Launch
- ❖ 10,000 Community Members
- ❖ Smart Contract Deployment
- ❖ Burn 70% of Total Supply
- ❖ Listing on Sites to Vote for Coins
- ❖ Whitepaper Release
- ❖ Listing on Pancakeswap
- ❖ Liquidity Burn

Phase
